# Beginning Photography & Photoshop

## Enjoy LCC's new Digital Art Lab

*Digital art classes have a new home at LCC. Beginning Photography and Photoshop students learn in a beautiful new computer lab in Main 118, with all new equipment and the latest software.*

**Art 151, Beginning Photography**, now includes both digital and analog information and skills. Students learn how to use a camera and study composition, exposure, editing and presentation. Choose between the digital or traditional lab to learn how to do darkroom work or work with images in PhotoShop.

**Art 162, Photoshop for Web and Print**, is an introduction to digital photo editing for web designers, graphic design students, and anyone who wants to learn how to correct their digital photos, or create collages, albums, and more.

**ART 297, Adobe Workshop**, for more advanced students who have completed ART 162.

Class schedule at [lowercolumbia.edu/classes](http://lowercolumbia.edu/classes)

### Find out more:

Contact photography instructor, Marvin Pierson,  
[photoflashart@q.com](mailto:photoflashart@q.com)  
or PhotoShop instructor Debby Neely,  
[dneely@lowercolumbia.edu](mailto:dneely@lowercolumbia.edu)
